Praktična primjena baza podataka – vodič za početnike

Iva Arači, mag. informatol.

Baze podataka

- Skup obrađenih i na poseban način organiziranih podataka i kao takve predstavljaju nezaobilazan izvor **pouzdanih informacija**
- **Polazišna točka** kod svakog istraživanja literature i pretraživanja informacija koje koristimo u svome radu i istraživanju
- Vrste baza podataka:
  - Bibliografske – koristimo kada želimo dobiti kratak uvid o radovima koji su pisani na temu koja nas zanima; mogućnost brzog pregleda velikog broja radova
  - Citatne – koristimo u svrhu prosudbe kvalitete radova (koliko su radovi citirani)
  - Baze podataka s cjelovitim tekstom – koristimo kada nam je potreban uvid u cjeloviti tekst pojedinog rada
- U biotehničkim znanostima najčešće korištene – Web of Science, Scopus i CAB Abstracts

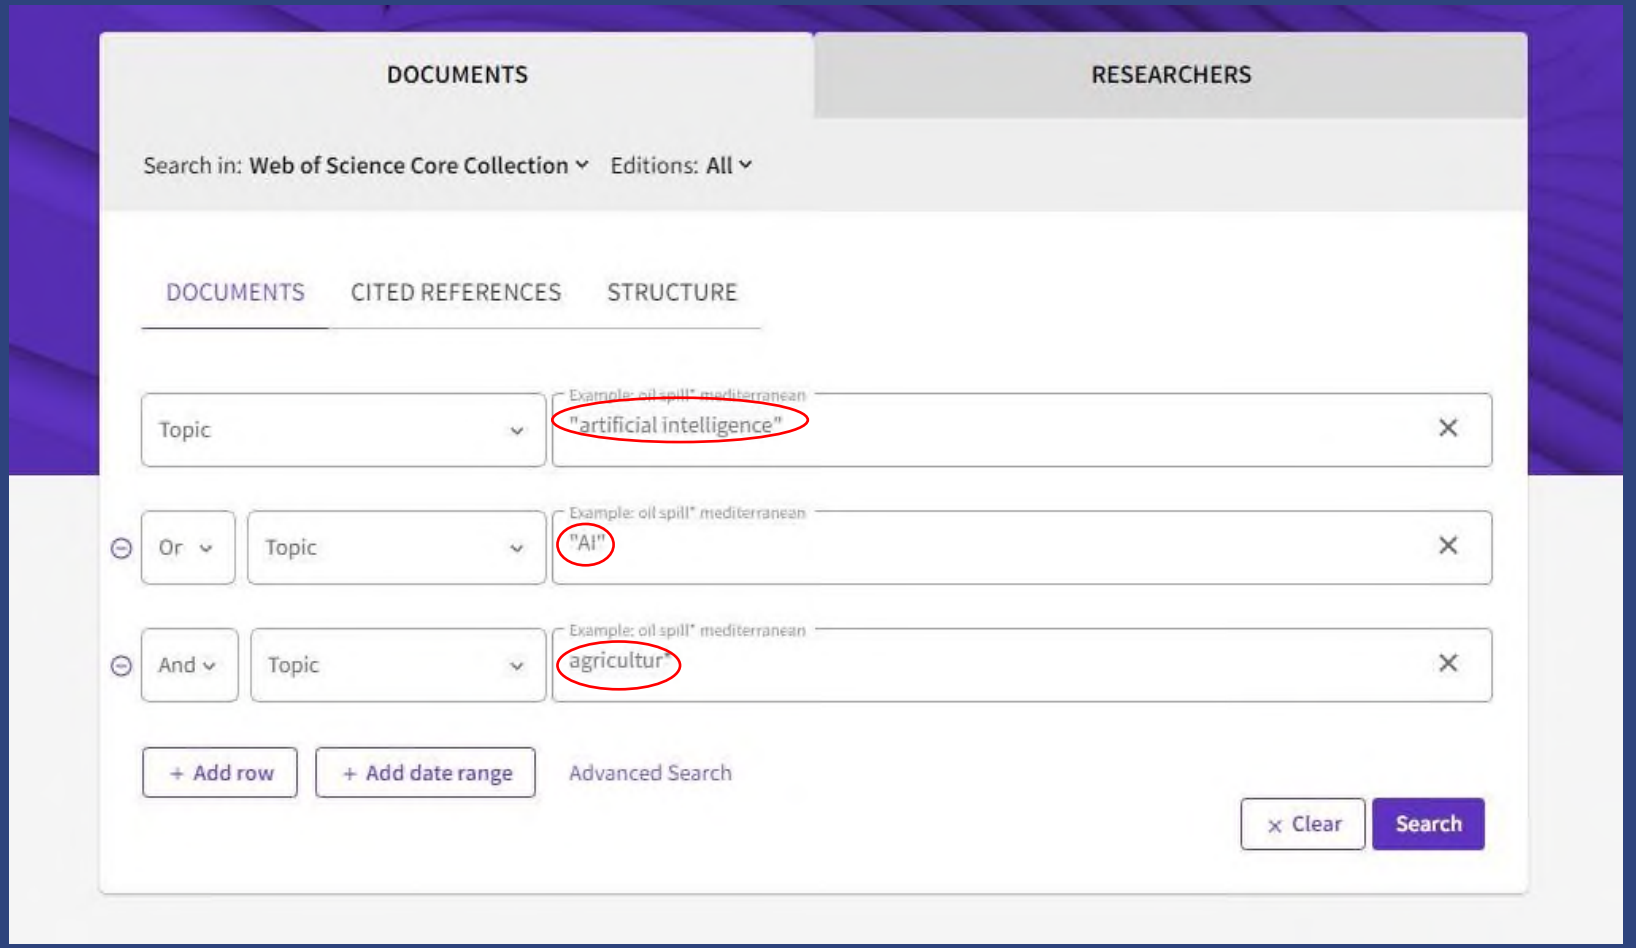

Oblikovanje upita

- 1. korak: Precizno definiranje **upita** – što nas zanima? Čime se bavi naše istraživanje?
  - Primjer: *Kako primijeniti umjetnu inteligenciju u poljoprivredi?*
- 2. korak: Definiranje **ključnih riječi**
  - Ključne riječi: umjetna inteligencija (eng. *Artificial intelligence/AI*), poljopriveda (eng. *Agriculture*)
- 3. korak: Oblikovanje **upita**
  - u bazama podataka nije preporučljivo služiti se prirodnim jezikom (npr. postaviti upit: „Kako primijeniti umjetnu inteligenciju u poljoprivredi?”)
  - upit raščlanjujemo na ključne riječi na engleskom jeziku
  - služimo se Booleovim operatorima (AND, OR, NOT)
  - koristimo znakove za kraćenje i zamjenske znakove („”,*,?)

Web of Science

Tematsko pretraživanje - Topic search

- Topic search (tematsko pretraživanje) – automatski pretražuje naslove, sažetke i ključne riječi koje odgovaraju postavljenom upitu

Artificial Intelligence (AI) is being widely used in diverse domains such as industrial automation, traffic control, precision agriculture, and smart cities for major heavy lifting in terms of data analysis and decision making. However, the AI life-cycle is a major source of greenhouse gas (GHG) emission leading to devastating environmental impact. This is due to expensive neural architecture s ... Show more

Parallel to the rising debates over sustainable energy and artificial intelligence solutions, the world is currently discussing the ethics of artificial intelligence and its possible negative effects on society and the environment. In these arguments, sustainable AI is proposed, which aims at advancing the pathway toward sustainability, such as sustainable energy. In this paper, we offered a no ... Show more

IoT, Big Data, and Artificial Intelligence in Agriculture and Food Industry
Misra, NN; Dixit, Y; (...); Martynenko, A
May 1 2022 | IEEE INTERNET OF THINGS JOURNAL 9 (9) , pp.6305-6324
Internet of Things (IoT) results in a massive amount of streaming data, often referred to as "big data," which brings new opportunities to monitor agricultural and food processes. Besides sensors, big data from social media is also becoming important for the food industry. In this review, we present an overview of IoT, big data, and artificial intelligence (AI), and their disruptive role in sha ... Show more

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. Learn more

Autorsko pretraživanje (Researchers)- autorski profili

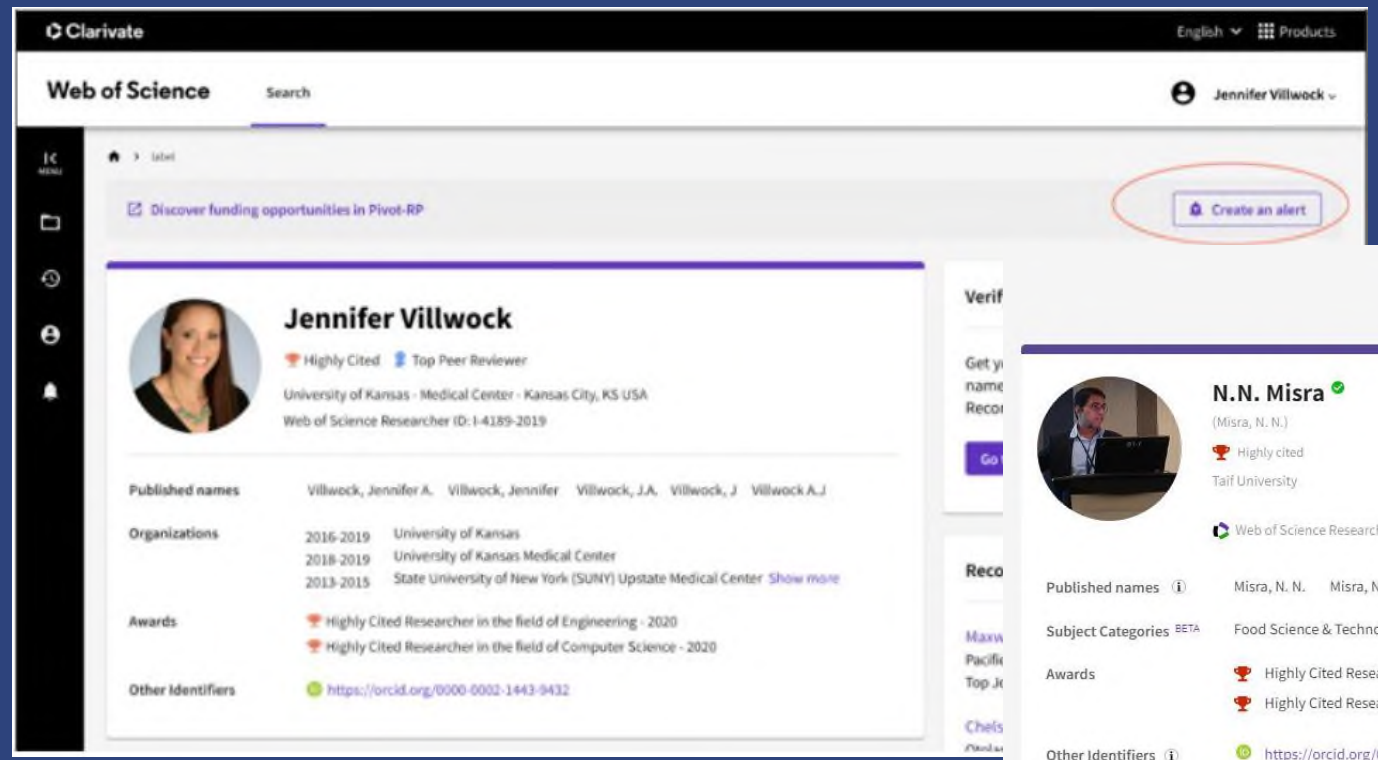

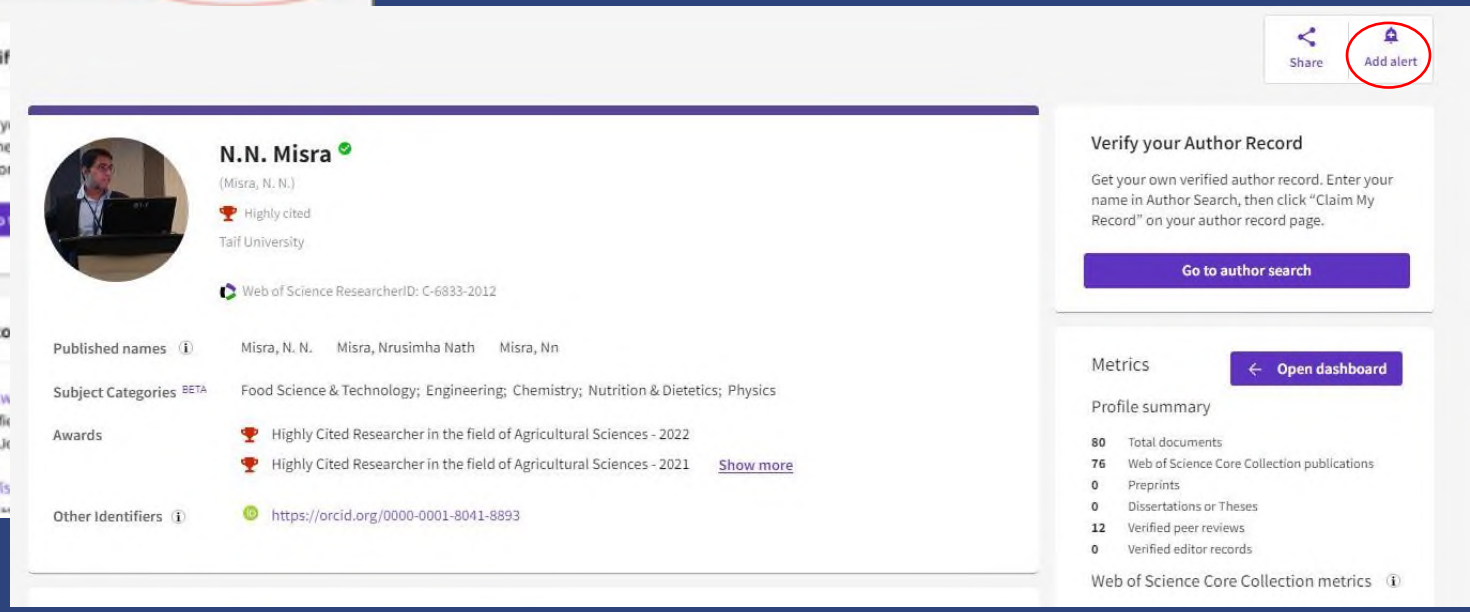

Pretraživanje po instituciji

Web of Science – Author Alerts

- Koristan alat za autore koji omogućuje praćenje napretka i popularizacije vlastita rada (Citation alert, Journal alerts) u znanstvenoj zajednici, ali i rad drugih autora iz interesnog područja

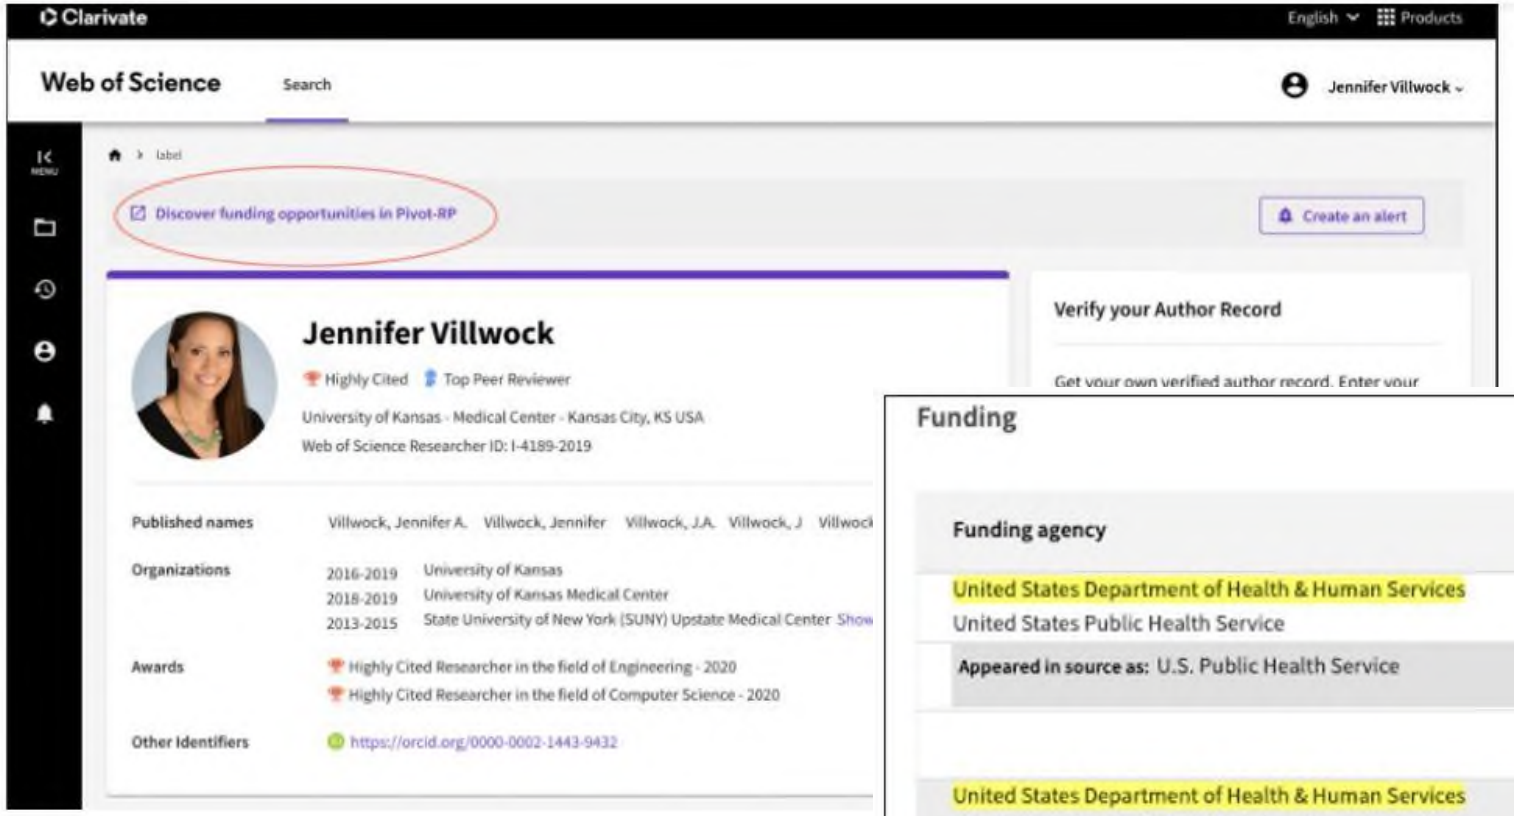

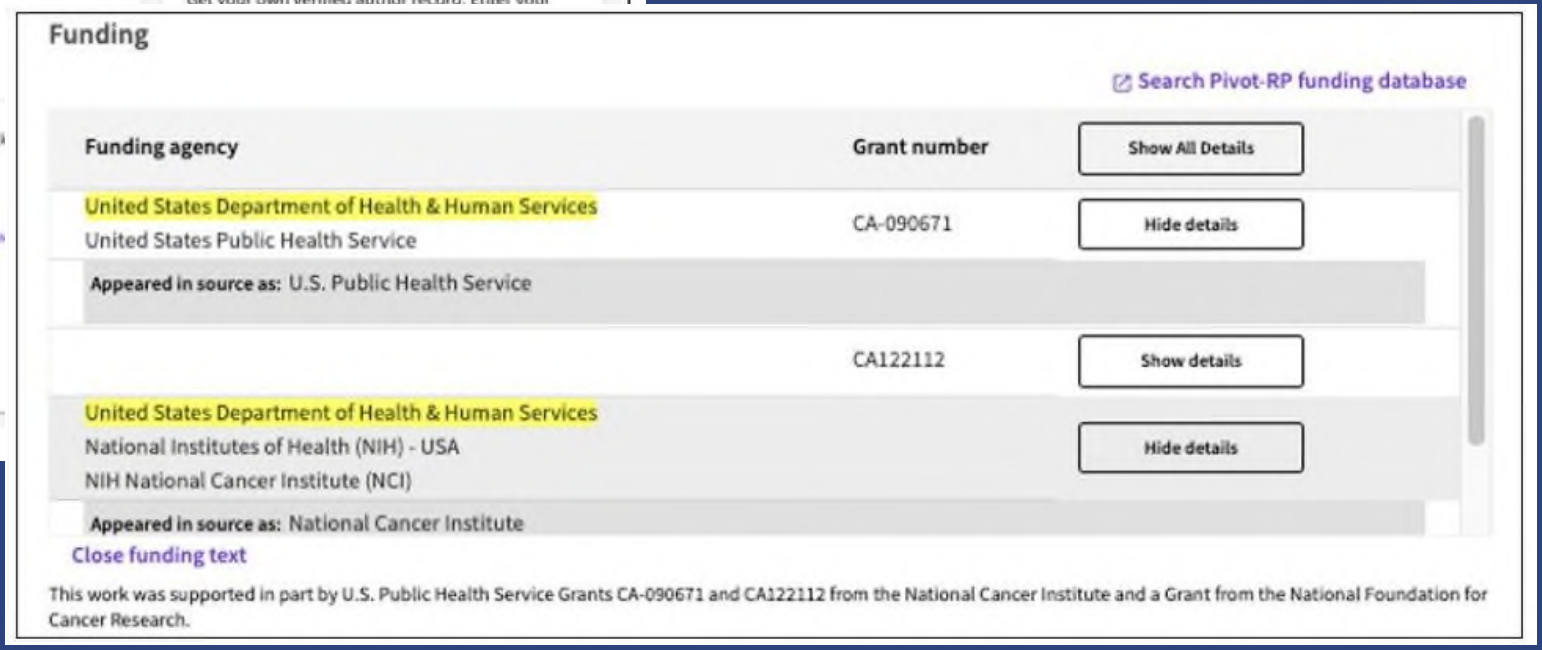

Pivot-RP

- Novi alat nastao u kolaboraciji tvrtke ExLibris i Clarivate (Web of Science) kojemu je cilj olakšati znanstvenicima istraživanje kroz povezivanje znanstvenika i znanstvenih institucija s potencijalnim donatorima i fundacijama namijenjenim za znanstvena istraživanja
- U okviru interesnog područja autora znanstvenika program generira mogućnosti pronalaska donatora te omogućuje povezivanje znanstvenika u znanstvene kolaboracije koje će u suradnji potraživati novčane doprinose za istraživanja
- Zamišljeno je i da alat obavještava korisnike o nadolazećim konferencijama i događanjima u području znanstvenoga interesa

Clarivate™

Besplatnu demo inačicu Pivot-RP alata možete potražiti na: https://discover.clarivate.com/ExLibris_pivot-rp-from-news-request-free-demo

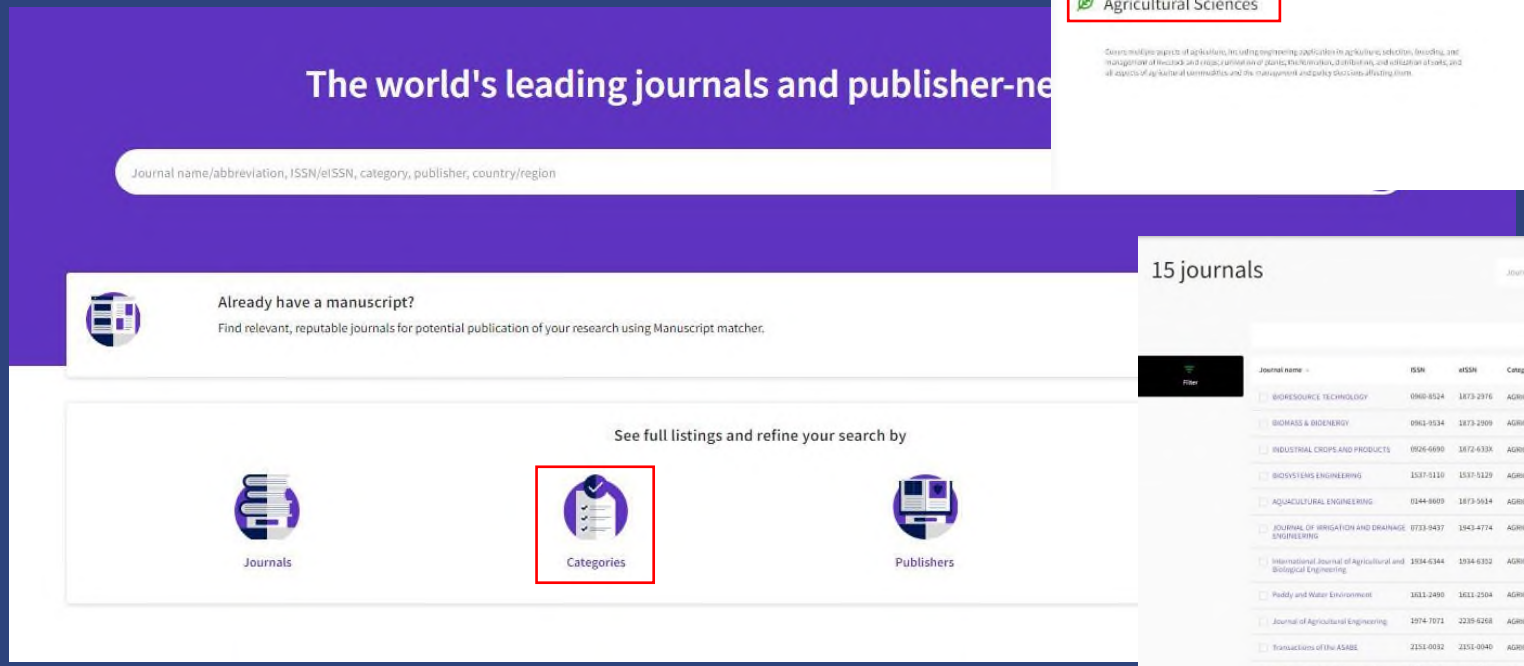

Journal Citation Reports

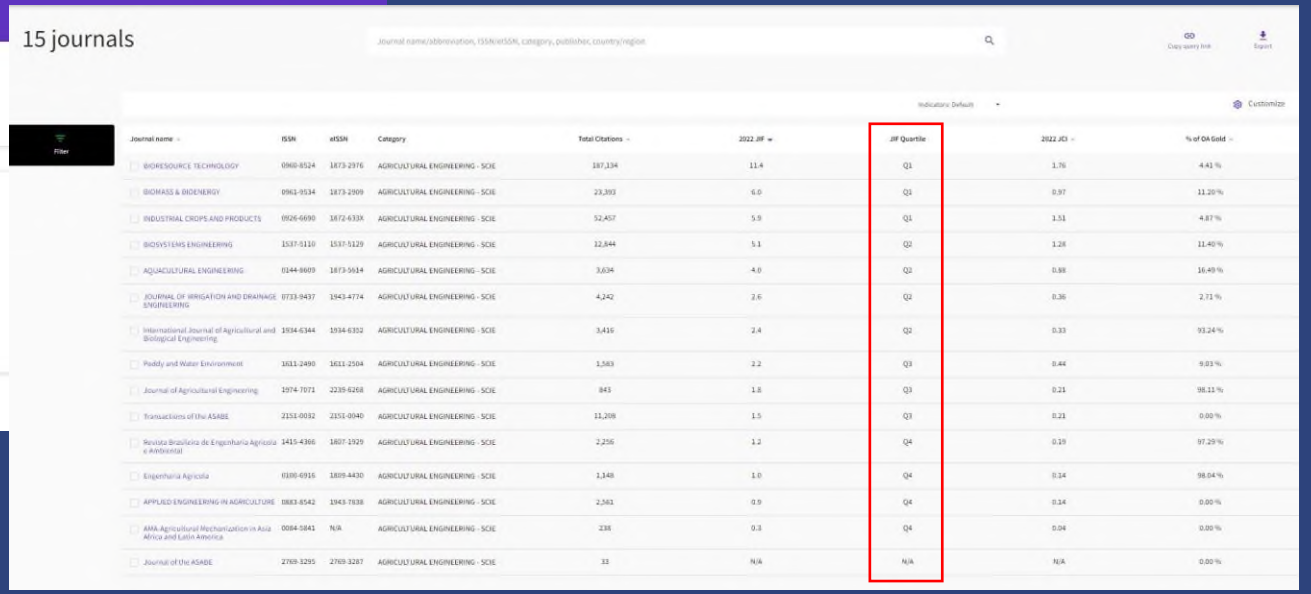

- Citatna baza podataka koja pomoću **citiranosti** objavljenih radova omogućuje **sustavno i objektivno** određivanje **utjecajnosti i kvalitete časopisa** unutar nekog znanstvenog područja
- Krovna baza koja nudi uvid u ključne bibliometrijske pokazatelje časopisa – **Impact Factor (IF)** (hrv. faktor odjeka) i **kvartile** (Q1,Q2,Q3,Q4)
- Na temelju bibliometrijskih pokazatelja časopisa u kojemu znanstvenik objavljuje vrednuje se i njegov rad
- Časopisi koji se nalaze u **Web of Science** bazi podataka imaju svoje profile u JCR bazi podataka

Journal Citation Reports

- Baza korisna pri odlučivanju u kojemu časopisu objaviti rad budući da jasno, precizno i koncizno prikazuje poziciju časopisa (prema IF) u znanstvenoj zajednici, opisuje časopis i nabraja znanstvena područja kojima se bavi te jasno prikazuje sve metričke pokazatelje napredovanja časopisa u prošlosti i obzirom na iste predviđa uspješnost časopisa u budućnosti (Journal Citation Indicator - JCI)

CAB Abstracts

- Bibliografska baza podataka u izdanju CABI Publishing koja indeksira serijske publikacije s područja **primijenjenih biotehničkih znanosti** uključujući poljoprivredu, šumarstvo, nutricionizam, veterinarstvo, znanosti o okolišu i srodne discipline.
- Daje kratak i koncizan uvid u članke (naslov, autori, sažetak i sl.) objavljene u različitim časopisima i zbornicima skupova
- **Ne broji citate** i kao takva nema mogućnost dati uvid u metričke pokazatelje
- Za područje biotehničkih znanosti bitna jer se radovi indeksirani u istoj broje u **A2 i A3 kategorije radova**
- Pokriva veći broj domaćih časopisa i konferencija nego baze WoS i Scopus

Indeksirani domaći časopisi

Indeksirane domaće konferencije
